

Get Rid Of Your Plastic Waste – Avoid A Fine

New Defra regulations mean that you must dispose of your waste plastic through an approved scheme. You could face a fine of **£20,000** if you fail to comply. Don't get caught out - join us today!

Unique Solway 'bin and liner' system organises your waste and takes away the hassle.

100's of businesses have joined this successful and efficient scheme.

In partnership with Solway Recycling, your waste is turned into picnic benches and other environmentally friendly outdoor furniture.

Suitable for agricultural, horticultural and equine businesses.

Quick and easy membership and set up. Bag it up and we take it away.

£40 - £80 average yearly costs of disposal – just give us a ring when your liners are full and we collect.

We get rid of all of the following 'controlled' wastes:

- Silage Bale Wrap
- Silage Pit Covers
- Feed Bags
- Sawdust Bags
- Packaging Waste
- Bulk Feed Bags
- Fertilizer Bags
- Bale Twine
- Net Wrap
- Plastic Animal Medical Containers*
- Plastic Drums*
- Collection of other hazardous waste can be arranged (e.g. tyres, batteries, waste oil, unused medicines and chemicals – quotes on request).

*These must be triple washed
